

## Adding a prior consent

1. The Prior Consents list can be opened by the Applicant by selecting "Consents" in the top Navigation bar *or* the corresponding card in their landing page:

2. To configure a new prior consent, the Applicant hits "Add" :

3. After entering the prior consent data, the Applicant hits “Add” to persist the new prior consent:

**BRAIN <> CHAIN** | Accreditations | Consents | a1@gmail.com | EN

[Back](#) | **Create prior consent**

Target type\* | Organization

Organization

Internet Domain\* | temp.org

Period

Auto-grant till\* | 03/06/2019

Duration\* | 3 | Week

Response comment | Leave your comment here...

**Add**

At any time, such configured prior consent can be revisited from the list of prior consents (cf. below).

### Editing prior consents

1. To edit a prior consent, the Applicant clicks the corresponding row in the prior consents table:

**BRAIN <> CHAIN** | Accreditations | Consents | a1@gmail.com | EN

**Prior consents** | **Add**

Target type	Target data	Auto-grant till	Duration	
Organization	temp.org	March 6, 2019	21 days	

2. This opens a page with the prior consent details:

The screenshot shows the 'Edit prior consent' page. The header includes 'BRAIN <> CHAIN', 'Accreditations', 'Consents', and user information 'a1@gmail.com' with a language dropdown 'EN'. A 'Back' link is at the top left. The form fields are: 'Target type\*' (Organization), 'Organization' (empty), 'Internet Domain\*' (temp.org), 'Period' (empty), 'Auto-grant till\*' (03/06/2019), 'Duration\*' (3) with a 'Week' dropdown, and 'Response comment' (Leave your comment here...). A blue 'Save changes' button is at the bottom right.

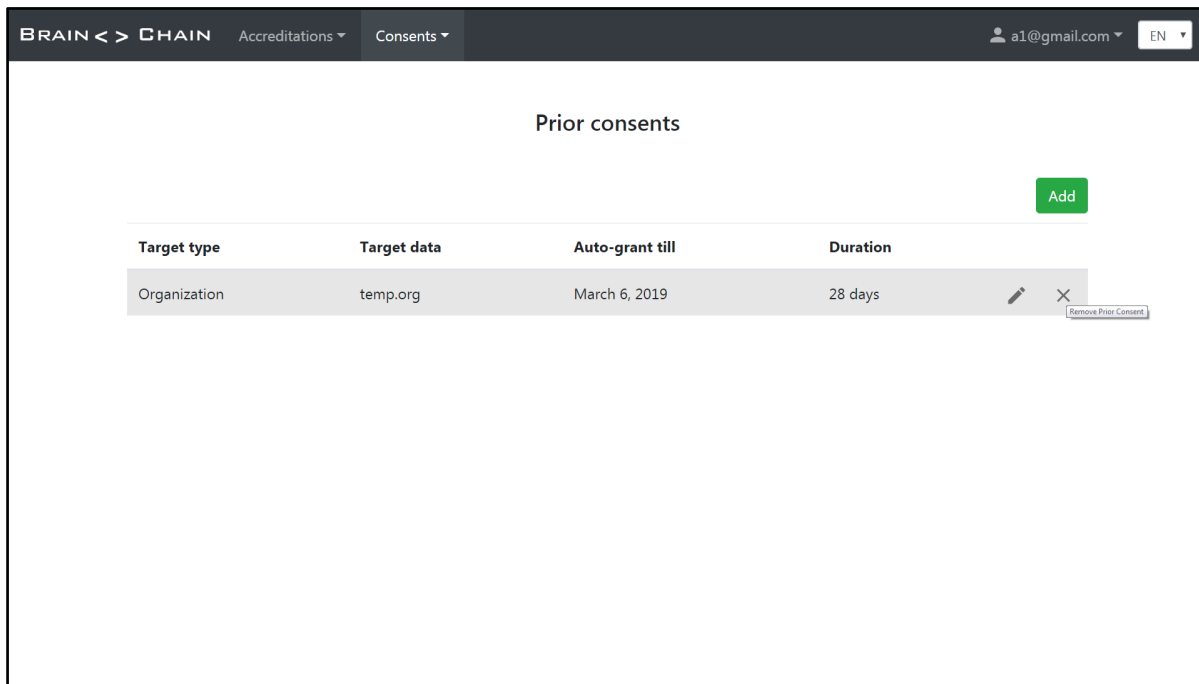

3. After editing the prior consent details, the Applicant hits "Save changes" to immediately persist the changes, at which point the Applicant is routed back to the list of prior consents.

This screenshot is identical to the previous one, but the 'Duration\*' field now contains the value '4'. A tooltip above the 'Auto-grant till\*' field reads 'Consent duration will be 28 days'. The 'Save changes' button is highlighted in blue, indicating it has been clicked.

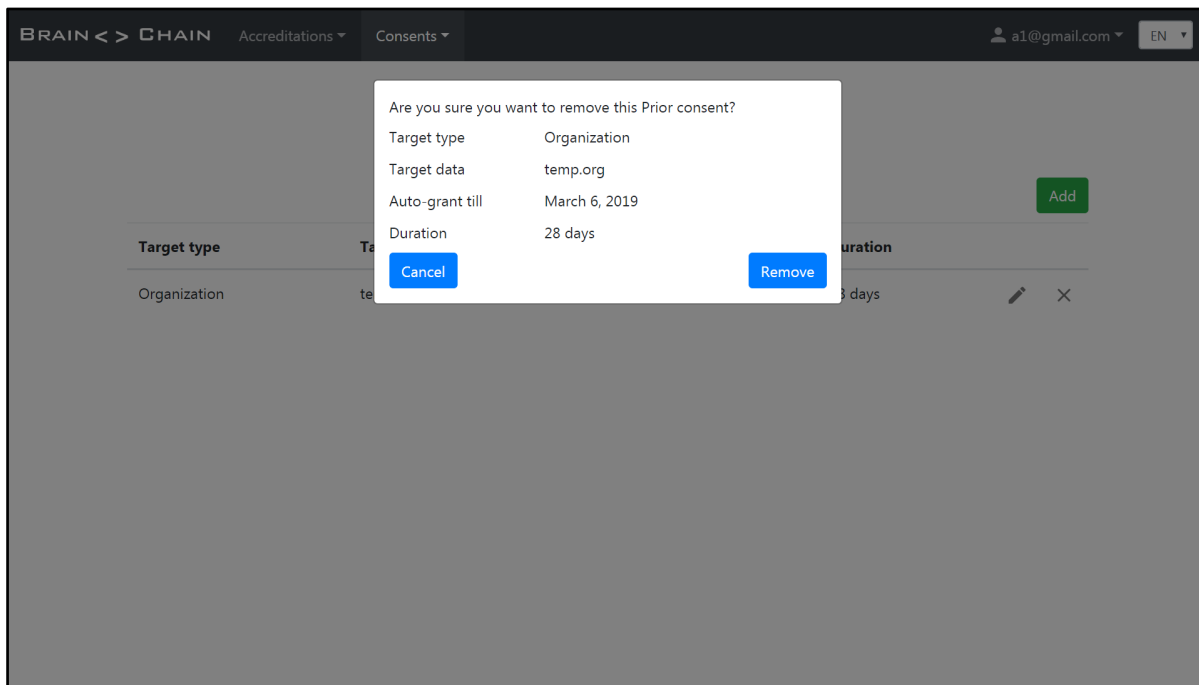

## Removing a prior consent

1. To remove a prior consent, the Applicant hits "✕" in the corresponding table row:

2. This opens a modal dialog requesting removal confirmation:

3. The Prior consent is immediately removed and confirmation of the removal given:
